

## **Angelic BluePrint/Human Design Blueprint in a Nutshell**

**By Peter Roe**

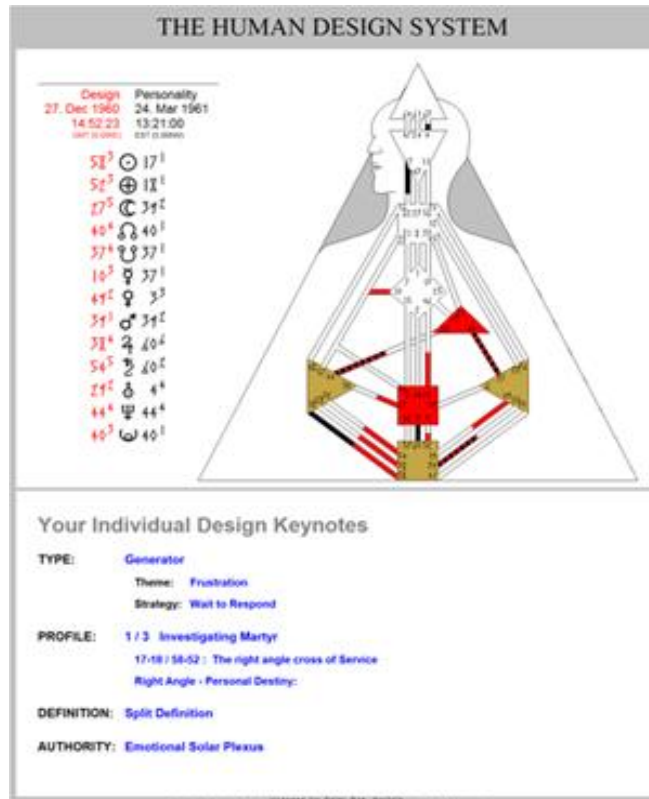

**What is human design?** Human design is a tool to understand personal action and interaction from an energetic viewpoint. Human Design is a synthesis of Eastern and Western Astrology, The Chinese I'Ching, quantum physics, the Hindu Chakra system and the Kabbalah. My visual representation for Human Design *is the energetic wiring of your physical, emotional, and mental bodies, which integrates with your spiritual body or your soul.* Just as the size and shape of crystals in a snowflake are affected by the temperature, the atmospheric pressure and the humidity level at their time of formation, your human design blueprint is energetically impacted at birth by the angles of the planets, stars the sun and the moon.

**What is the Human Design Blueprint?** I like to call the Human Design body graph the Angelic Blueprint because it comes from the stars that are the home of the Angelic forces and like the blueprint of a house; it illustrates the design and features. Are the rooms small and defined or are they open and airy. Is the house designed for efficiency or does it meander? The human design blueprint sheds light on many of the attributes of how a person is designed to act through their energetic circuitry.

**What scientific facts support the electric model?** The human body is an electric and energetic vehicle. The food you eat is broken down to provide energy. The energy is controlled by electronic signals to and from the brain. The signals travel down the pathways of the nerves to various parts of the body. Science has shown that thru electronic waves like lasers, electromagnetic pulse, and x-rays that cells and structures in the human body can be changed. Planets, stars, the sun and the moon give off electric and magnetic waves all the time which are measurable on the planet. It's these waves of energy and the angles which they come from relative to planet earth that create your energetic blueprint during the fetus development and at birth.

**How does understanding Human Design help?** By understanding your design features, both strengths and limitations, you can identify and create strategy to maximize your design. For example, a quiet contemplative design will probably do better in an academic setting, verses a position in the marketing or sales arena. A person with a design of investigation and experimentation needs space to carry that out. While these are very general examples, human design goes to very deep levels of detail. The more you understand your design, the design of your friends, your family and your children, the more you can identify areas of energetic conflict and areas of energetic synchronicity. The deeper you understand these areas, the more you can maximize productivity, increase harmony and reduce conflict by developing and implementing strategies. The more you live your design, the more aligned you are to carry forward your life purpose.

## What makes up the Human Design /Angelic Blueprint?

The Blueprint consists of two sets of numbers surrounding planetary symbols, a graphic chart with lines and shapes and a section on Design Keynotes.

**The numbers:** The two sets of numbers are the key data that go into the graphic chart and are the elements that drive your design. These numbers are called gates. These are the gates of the I'Ching. The gates on your chart are determined by the relative position of the planets to earth and a mathematical calculation as to what gate the energies of the planets are coming thru at the time of your birth and approximately 88 days before birth when your soul crystal is seeded into your fetus.

**The Graphic Chart:** The gates are then fed into the graphical chart called the Rave body graph. Each of the 64 gates of the I'Ching are represented by half a line and a number. Each gate is connected to 1 of the nine centers. The 9 centers are represented by shapes of triangles, squares and a diamond. The centers are connected by a combination of 2 gates. Each 2 connecting gates form what is called a channel. The gate half lines are colored in for each gate occurrence in the columns numbers. When two connecting gates are colored in forming a defined channel, the centers on both ends are colored creating defined centers. Each chart has defined and undefined attributes. The defined attributes are colored in and the undefined attributes are white or not colored in. Understanding what is defined and what is not defined within a chart is the key to understanding the body graph.

**The Keynotes:** The keynotes are made up of several statements. These include your type and strategy which is key to living your design. They define the high level role

that you play in this life. The **profile** is made up of two numbers. The interpretation of these two numbers describes the characteristics of how you play out your role in this lifetime. Are you investigative, experimental, a bit of a hermit, a social net-worker, projective, or more of a role model. The **cross** is the incarnation cross and is defined from the 4 lead gates of your design relating to the Sun and the Earth. The incarnation cross is the cornerstone to your life purpose. The **definition** speaks to the connectedness of your defined centers. The **authority** identifies where you can find true authority for making decisions while living your design.
